Objective

I am seeking a competitive and challenging environment where I can serve your organization and establish a career for myself and use my experience and education to help the company meet and surpass its goals.

Professional Experience

freshCart

I developed a professional **e-commerce** project that includes a secure user **authentication** system, a functional shopping cart, and a wish list feature. The project demonstrates my expertise in web development and ability to create robust and user-friendly e-commerce solutions. I also utilized **RESTful APIs** for seamless integration with other systems and platforms, and implemented **payment integration** for secure online transactions. My experience in payment integration showcases my ability to develop reliable e-commerce solutions that meet the needs of both businesses and customers.

Trending

an online database of information related to films, television series, home videos, video games, and streaming content online.

- Integration with moviedb API
- Define project architecture for front-end using React.
- Design project state management using Redux-toolkit.
- Build user authentication using JWT.

Common Skills I have Used To Build This App

- React js
- Hooks and function component
- Bootstrap
- Axios File as
- Server

Projects

Game Over Website

I developed a ReactJS-based project for online gaming, where users can register and login using React Router Dom and manage their state using useContext hook. Formik library was used for form management and validation, while Axios and JWT were used for authentication purposes. The project also utilizes React Hooks and external libraries to provide a seamless user experience. Overall, the project boasts an attractive design and ease of use, with optimized performance and validation using Formik and Axios.

Food Recipe Website

Developed a fully functional food website using HTML, CSS, Bootstrap, JavaScript, jQuery, DOM, regular expressions, APIs, and AJAX. The website allows users to search for recipes by name, category, origin, and ingredients, and provides detailed information about each recipe, including articles, videos, and instructions. Implemented regular expressions in the contact form for optimal validation and user experience.

Portfolio

Portfolio is a living and changing collection of records that reflect your accomplishments, skills, experiences, and attributes. It highlights and showcases samples of some of your best work, along with life experiences, values, and achievements.

- Build Profile By HTML, CSS, and JavaScript.
- Linked Other Project on it

Store Management System

CRUDS

Have built CRUDS System and Learned how to create (Create, Read, Update, Delete, and Search) on the CRUDS application with plain JavaScript. We are not going to use any JavaScript frameworks instead we use plain JavaScript, CSS, and HTML to build a CRUD application. - Common Skills I have been Used

- HTML
- CSS
- Bootstrap
- Javascript
- Local Storage

Technical Skills

HTML5

JavaScript

AJAX

BOOTSTRAP5

REDUX/REDUX-TOOLKIT

SASS

OOP

GIT/GITHUB

CSS3

TypeScript

JQuery

REACT

RESTFUL APIS

REGULAR EXPRESSION

Languages And Technologies

- Complete understanding of web application development lifecycle from planning, requirement gathering, development, testing, and launching.
- Build complex & highly scalable frontend applications in close cooperation with the Team.
- Integration with Restful APIs JSON using Axios, fetch API.
- Knowledge of React tools including React.js, Redux, Webpack, and Context API.
- Good knowledge of SEO techniques.
- Strong Knowledge of HTTP/S Protocols, REST and SOAP, and Microservices.

Courses

Front end Development Route

Academy

The course covers front-end tools: JavaScript, AJAX, JSON, and React.js. development of a new highly-responsive, web-based user interface.

Develop a flexible and well-structured project architecture and the APIs to support it.

Translate designs, wireframes, and business requirements into solutions using high-quality code.

Google IT Support
